The system dashboard

Dashboard presents the status and overview of the institution. Visual presentation of the sales and expense through graph and pie chart are there. Total count of the daily, monthly and yearly sales and expense and number of appointments. Dashboard contains the appointment calendar through which you can see all the appointments for can see the patient history by clicking on appointments.

Appointments

You can create, edit and delete appointments. Can manage Today's and upcoming appointments. You can see appointments based on status like requested, pending, confirmed, treated and cancelled.

Human Resource

This is the module where you can create all the hospital staffs like Nurses, Accountants, Receptionists, Pharmacists and Laboratories. All those staffs can login the system with their specific access permission.

Finance

Can manage payments, expenses, invoices, due payments, daily, monthly, yearly and date to date reports etc. from this module.

Prescription

Can create and manage prescriptions with dynamic medicine selection. Link between Prescription and pharmacy allow pharmacist to see all the prescriptions.

Lab Test

Can manage all the lab reports and report templates. Template system allows to create report templates. During the creation of a report you just need to select your desired template. Then just change the values.

Medicine

Can add, edit and delete medicines and medicine categories. You can check medicine stock alert

Donor

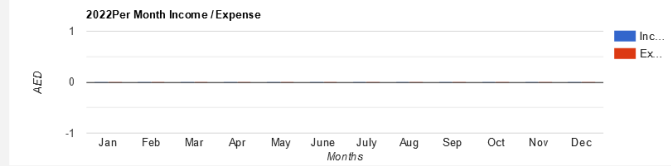

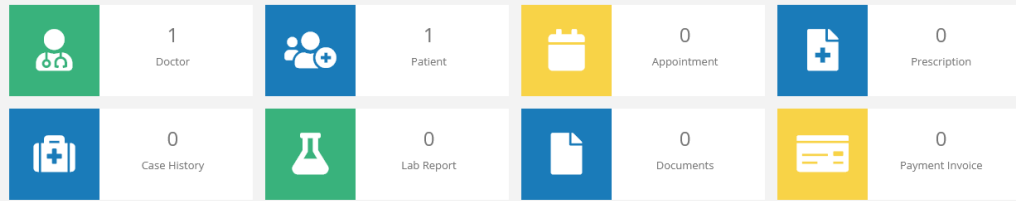

This module is for blood donors. You can list all the donor names with their contact number and can notify them in the times of need from the SMS and email module. Blood bank shows the number of blood bags you have in your stock. You can edit those information.

Report

You can check date-to-date report for all your financial activities. Strong User activity report where you will find user based financial reporting like the amount of cash collected by each accountant and receptionist. You can check each doctor's commission. Can check birth, operation and expire records. Daily, month and yearly payment and expense reports and many more.

SMS

You can send the sms to different group like all the patients or all the doctors or donors of a specific blood group. Also can send individual patients and any other email address. You can configure the auto sms templates. During the creation of appointments, payments or live meetings sms are sent to patients and doctors. You can create those messages from here. You also need to select SMS gateway from the settings option. There are multiple sms gateways integrated in our system.
